

Disinfecting Cleaning COVID-19 Protocol

KEEPING YOU SAFE

Faith Janitorial Corporation is here to provide your cleaning and disinfecting needs. We offer COVID-19 Disinfecting Cleaning, Deepcleanings and Routine Cleaning (up to 7 days per week). Additional services are also available including: Carpet Cleaning, Floor Machine Cleaning/Scrubbing, Wall Cleaning, and Window Cleaning.

The Disinfecting Process

Proper disinfecting is applying professional grade disinfectants to surfaces. After applying the disinfectant, it is allowed the sufficient dwell time to appropriately kill the COVID-19 virus in compliance with **CDC guidelines**.

Different Types of Disinfecting We Provide

BACKPACK PUMP & ELECTRIC SPRAYING

This service is recommended in offices, production areas, and medium to high density areas so the chemical is mist sprayed evenly with more square footage being covered.

ELECTROSTATIC SPRAYING

The recommended method to help disinfect an area by giving an electric charge to the liquid to quickly and evenly coat a surface. This is required for offices due to the multitude of touch points.

FOGGER

This is recommended for wide area coverage of large spaces such as warehouses and manufacturing buildings. This process needs to be monitored carefully so electrical equipment doesn't get damaged by water.

SPRAY BOTTLE & HAND WIPING

This is used when smaller and sensitive areas need cleaning. This process is very detailed to make sure nothing is missed.

High Touch Point (HTP)

High touch points are items within your facility frequently touched. Includes: door handles, desk surfaces, restroom stall locks/handles, toilet flushing handles/seats, sinks, water fountains, light switches, wall areas surrounding light switches, garbage containers, chairs, phones, etc.

Routine Cleaning of High Transmissible Areas

High transmissible areas are any area(s) within your facility frequently used by people. The more surfaces are touched on a regular basis, the more transmissible the area becomes to spreading the virus. Includes: break rooms, lobbies, cafeterias, locker rooms, waiting rooms, showers, restrooms, patient rooms, personal work spaces, and conference/meeting rooms.

Disinfecting Cleaning We Offer

PREVENTATIVE

Includes the application of professional grade disinfectants using electrostatic sprayers, foggers, spray bottles, and wiping if needed. All horizontal surfaces, "Common Use" High Touch Points (HTP), "Personal Use" HTPs (e.g. desk phones, keyboards, etc.), restrooms, break rooms, and other common areas will be disinfected.

AFTER A CONFIRMED CASE

After a confirmed case of COVID-19 in your building, Faith Janitorial Corporation can provide a full decontamination of your entire facility to disinfect every surface top to bottom. This includes our disinfection application process of professional grade disinfectants using sprayers, foggers and hand wiping. Every surface and all HTPs throughout your building will be disinfected.

Disinfecting Cleaning COVID-19 Protocol

The Disinfecting Cleaning process will need to be performed to clean surfaces. The cost of general cleaning or deepcleaning to surfaces/areas is not included, unless specified. Separate rates are identified within the quote provided by Faith Janitorial Corporation for cleaning (if needed).

Faith Janitorial Corporation does not guarantee the COVID-19 virus will be completely eliminated from the areas we provide treatment to. One-time disinfecting and/or cleaning does not prevent future contamination. Regularly scheduled routine cleaning and disinfecting of occupied facilities are the best defenses in both combating and eliminating the COVID-19 virus.

Further steps to help prevent the spreading of the COVID-19 virus include:

- 1. Wash your hands often with soap and water for at least 20 seconds. If not available, use an alcohol-based hand sanitizer.**
- 2. Avoid touching your eyes, nose, and mouth with unwashed hands.**
- 3. Avoid close contact with people who are sick.**
- 4. Stay home when you are sick.**
- 5. Cover your cough and sneeze with a tissue, then throw it in the trash.**
- 6. Clean and disinfect frequently touched objects and surfaces.**

For more information on fighting the COVID-19 virus, or for PDF's for your location please visit the [CDC website](https://www.cdc.gov).

The Disinfecting Cleaning process will focus on the following items/areas:

High Touch Points (HTP):

OFFICE AREAS:

- Chairs
- Conference tables
- Doors
- Door knobs
- Door handles
- Desk horizontal surfaces
- Garbage containers
- Light switches
- Phones
- Wall areas surrounding light switches

BREAK ROOM/CAFETERIA:

- Break room tables
- Exterior of appliances and handles
- Exterior of cabinets/handles
- Counters
- Water fountains

RESTROOMS:

- Restroom stalls
- Stall locks/handles
- Toilet flush handles
- Toilet seats
- Sinks

Disinfecting Cleaning COVID-19 Protocol

Risk Assessment Scoring

A risk assessment of each facility will be completed to assess the risk of contamination.

Probability of Contamination

Heavy contamination (score=3)

Moderate contamination (score=2)

Light contamination (score=1)

Score

Vulnerability of Population to Contamination

High potential (score=2)

Moderate potential (score=1)

Low potential (score=0)

Score

Frequency of Usage

High frequency touched surfaces (score=3)

Low frequency touched surfaces (score=1)

Score

Known cases of COVID-19 Coronavirus in the workplace

1 or more confirmed cases (score= 5)

1 or more unconfirmed cases (score=3)

0 cases (score=0)

Risk Assessment Levels

Low (Preventative) Risk Score: 3 or Less

For locations scoring 3 or less, normal cleaning services are recommended. If a customer would like to be provided additional disinfection cleaning, we can perform those services as requested.

Moderate Risk Score: 4-6

For locations scoring a 4-6. If a known COVID-19 case was identified refer to High Risk services. If not, conduct Moderate Risk services which would include deep cleaning of all surfaces and frequently touched surfaces. Ongoing preventative disinfection application services are recommended.

High Risk Score: 7 and Above

For locations scoring 7 or greater, highest level of PPE precautions should be deployed and full disinfection cleaning should be applied. This would require manual cleaning of every surface using EPA approved disinfectants.

Upon completion of the risk assessment, Faith Janitorial Corporation will customize the services necessary for your facility.
